

AK-ZG610T

Hardness: 54-57

Description: Edge filler welding of Cr12MoV, SKD61 and other tool steel moulds.

AK-ZG910T

Hardness: 58-62

Description: With high-speed tool steel SKH51 composition similar to the tool steel complementary rest with high hardness, wear resistance, crack resistance is excellent.

AK-ZG299T

Hardness: low

Description: Joining of dissimilar metals, priming transition layer for hardfacing.
